PROFILE

DevOps & Cloud Engineer focused on infrastructure automation, CI/CD optimization, and cloud-native deployments. Experienced with AWS, GCP, Kubernetes, Terraform, Ansible, Docker, and GitOps workflows.

TECHNICAL SKILLS

EDUCATION

Master's – General Computer Science ENI Fianarantsoa	2025 – 2026
Bachelor's – General Computer Science ENI Fianarantsoa	2021 – 2024
Scientific Baccalaureate – Series D	2019 – 2020

PROJECTS

TaskFlow AWS DevOps & Monitoring Project	05/2026
- Designed and deployed a production-ready AWS EC2 infrastructure for hosting a web application. - Built automated CI/CD pipelines with GitLab CI/CD, Docker, and Linux-based deployment workflows. - Configured NGINX reverse proxy and implemented monitoring using AWS CloudWatch. - Integrated Amazon SNS notifications for real-time alerting and operational visibility. - Applied DevOps best practices for infrastructure reliability, security, and automation.	
Chelsea Squad App DevOps & Cloud Infrastructure Project	04/2026
- Managed Kubernetes GKE infrastructure for scalable hosting. - Implemented GitOps delivery pipelines with GitLab CI and ArgoCD. - Configured monitoring using Prometheus and Grafana.	
IC WebApp CI/CD & Cloud Automation Project	09/2025
- Automated Docker builds and application deployments. - Provisioned AWS infrastructure using Terraform. - Managed server configuration with Ansible automation.
