

Andriaherilanto Antsa Fiderana

Fullstack JavaScript Developer

Antananarivo, Madagascar antsafider@gmail.com +261 34 97 544 97 GitHub: fiderana19

LinkedIn: Fiderana Antsa Andriaherilanto

PROFILE

Full-Stack JavaScript Developer with strong DevOps and cloud engineering skills. Experienced in building scalable web applications using ReactJS and Node.js, with hands-on experience in CI/CD pipelines, Docker containerization, and cloud deployments (AWS, GCP). Passionate about bridging development and infrastructure to deliver reliable and automated systems.

TECHNICAL SKILLS

ReactJS	NextJS	VueJS	NestJS	ExpressJS	Laravel	React Native	JavaScript	TypeScript	PHP
Python	Java	MongoDB	PostgreSQL	MySQL	Git	TailwindCSS	Figma	Agile Scrum	Docker
CI/CD	Linux	AWS (EC2, S3, CloudWatch)							

EDUCATION

Master's – General Computer Science ENI Fianarantsoa	2025 – 2026
Bachelor's – General Computer Science ENI Fianarantsoa	2021 – 2024
Scientific Baccalaureate – Series D High School Diploma	2019 – 2020

PROFESSIONAL EXPERIENCE

Audience Management Application Ministry of Interior (MININTER)	08/2024 – 11/2024
- Developed an audience management platform. - Built REST APIs using NestJS and MongoDB. - Created responsive interfaces with ReactJS.	
Cash Management Application World Business Solution (WBS)	08/2023 – 11/2023
- Built a fullstack cash management application using React.js and Node.js (NestJS). - Designed and implemented REST APIs with MongoDB integration. - Worked on frontend/backend integration and system stability.	

PROJECTS

TaskFlow – Fullstack Deployment Platform	05/2026
- Built and deployed a fullstack web application using ReactJS and FastAPI. - Containerized the application using Docker for consistent environments. - Configured CI/CD pipelines to automate build and deployment processes. - Deployed backend services on AWS EC2 with NGINX reverse proxy. - Implemented monitoring and alerting using CloudWatch and SNS.	
Online Examination Platform	10/2025
- Built a fullstack examination platform using React.js and Laravel backend. - Developed REST API endpoints for exam management and user interactions. - Implemented MySQL database structure and integration.	
HacktoberFest Component Application	10/2024
- Contributed to an open-source React component library using TailwindCSS. - Developed reusable UI components for community contributions.	
Train Ticket Reservation Mobile App	06/2024
Built a mobile ticket booking application using React Native and ExpressJS.	

- Developed backend APIs for booking and reservation management.
- Integrated MySQL database for persistent data storage.

University Grade Management System

04/2024

- Built a university grade management system using React.js and Node.js (Express).
- Designed REST API architecture and database integration with MySQL.
- Improved UX following HCI principles.
